

## PETROGLIDE™ SAW GUIDE OILS

### Introduction

Petro-Canada's Petroglide oils are premium quality saw guide oils specially designed and tested for modern multi-blade, gang saws and edgers. Petroglide is formulated to provide optimum tackiness and reduced friction for increased recovery rates and sawmill productivity.

Petro-Canada's family of Petroglide products starts with the patented HT purity process to produce a 99.9% pure, crystal clear base oil – the purest in the world. By removing the impurities that can hinder the performance in competitors' saw guide oils, and blending in our specialty additives, Petroglide delivers maximum performance.

### Features and Benefits

#### Superior tackiness

- **Less wash off and better lubricity**
  - Reduces oil consumption, pitch build-up, energy costs, heat build-up and saw deviation
  - Proven to increase productivity, save money and contribute to greater sawmill profitability
  - Only Petro-Canada monitors and indicates the level of tackiness for each grade in the Petroglide family

#### Greater recovery with superior extreme pressure properties

- **Reduces friction and metal-to-metal contact**
  - Prevents wear and heat build-up for both saw guides and blades, minimizing saw deviation and maximizing recovery
  - Fewer saw and guide changes, longer cutting cycles, less unscheduled maintenance and lower operating costs

### Environmentally Friendly

- **Dioxin formation and environmental damage is reduced due to low levels of dioxin precursors**
- **Petro-Canada shares the sawmill industry's concern for the environment and is ISO 14001 Certified**

### Other Features

- **Outstanding water separation reduces oil wash-off**
- **Anti-rust inhibitor keeps blades cleaner helping to increase saw life**

### Applications

Petro-Canada's Petroglide saw guide oils are specially formulated to lubricate the multiple saws and guides of modern arbor edgers. Petroglide 68, 100 and 150 are recommended for use in arbor edgers (horizontal, vertical, single or double configurations), curve saws and thin kerf gang-saws manufactured by Ukiah, Kockums-Cancar, Schurman, Newnes, Optimil, McGehee, CAE, etc.

#### What is the HT difference?

Petro-Canada starts with the patented HT purity process to produce water-white, 99.9% pure base oils. The result is a range of lubricants, specialty fluids and greases that deliver maximum performance for our customers.

## Typical Performance Data

PROPERTY	TEST METHOD	PETROGLIDE		
		68	100	150
Density ASTM	D4052	0.8637	0.864	0.8777
Odour	Olfaction	Good/low	Good/low	Good/low
Viscosity, cSt @ 40°C / SUS @ 100°F cSt @ 100°C / SUS @ 210°F	ASTM D445	75.1 / 375.1 10.84 / 86.2	114.1 / 590.8 14.06 / 75.8	175 / 917.9 17.26 / 89.2
Viscosity Index	ASTM D2270	133	123	106
Flash Point, °C / °F	ASTM D92	230 / 446	268 / 514	252 / 486
Pour Point, °C / °F	ASTM D5950	-42 / -42	-36 / -33	-36 / -33
Four Ball EP Weld Load, kg	ASTM D2783	200	200	200
Tackiness Level, %	PCM 530	50	58	63
Filterability Performance	PCM 531	Pass	Pass	Pass
Rust Prevention	ASTM D665	Pass	Pass	Pass
Mechanical Emulsion, 54°C, mL water (minutes)	ASTM D1401	41-38-1(25)	43-37-0(15)	43-37-0(15)
Dibenzofuran (DBF), Dibenzodioxin (DBD), ppb	PCM 514	15	15	15

The values quoted above are typical of normal production. They do not constitute a specification.
